

## SITP 2019

### **The Algerian construction industry continues to offer potential for international companies**

Munich/Algiers, July 18, 2019 – Already for the 17th time, the SITP opens up opportunities for overseas companies in the Algerian construction and infrastructure sector. The trade fair for construction machinery, building material machinery, construction equipment and mining, which takes place in Algiers from November 19 to 23, 2019, is considered the most important platform for the construction industry in Algeria. In 2018, 307 exhibitors from nine countries showcased their products and services at the fairground Palais des Expositions Pins Maritimes.

Despite a slight cooldown in the national economy, Algeria remains an interesting market for the construction industry. The construction sector in Africa's largest country continues to grow and increased by 5.6 percent in 2018. Residential building and infrastructure projects in particular form the core of the government's construction program. At the SITP, companies from abroad have the chance to establish contacts with the relevant ministries and institutions. Partner of the trade fair is the Algerian Ministry of Construction, which uses the event to present its future projects.
